## **DETAILED ACTION**

### ***Reasons for Allowance***

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 8, the closest prior art of record, Klomdsorf et al (Fig. 1) does not disclose the following method limitations: providing an open loop control signal to the amplifier during an operating interval subsequent to the operating interval during which the characteristic is monitored. Regarding claim 13, the closest prior art of record, Klomdsorf et al (Fig. 1) does not disclose the following method limitations: applying a second open loop control signal to the amplifier, subsequent to the first open loop control signal, the second open loop control signal based on the stored characteristic monitored during the first burst. Regarding claim 19, the closest prior art of record, Klomdsorf et al (Fig. 1) does not disclose the following method limitations: providing open loop control signals to the amplifier for operation within the first range of frequencies based on the averaged characteristic stored in association with the first range of frequencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patent numbers (6,438,360; 6,744,313) are the amplifiers with the open loops.
